

LT TARGET KIT 1.5" Target Holder Kit

Everything you need at your fingertips

Our **LT TARGET KIT** contains a collection of our most popular and widely used target holders. All components of the kit are designed for use with SMRs having a 1.5" diameter. The kit includes a variety of target holders, extension bars, hidden point rod components, bushings, and more. See content listing in the table below.

Below, left: The kit components come in a customizable foam-lined polyethylene case having a legend in the lid which clearly defines the contents of the kit. Each item has an assigned location - there are no empty slots. This makes identification of lost or damaged components much easier.

Qty	Model	Description
10	1.5THDN	1.5" Drift nest
1	1.5THS-1	1.5" Shankless target holder
