

15206 Micrometer Adapter

Put a micrometer on your alignment telescope

Our **15206** micrometer adapter allows you to use your Brunson 190 or 160 micrometer on any instrument having a barrel diameter of 2¼" (e.g., most alignment telescopes). Three nylon setscrews secure the adapter to the barrel of the instrument without marring.

Below: The 15206 adapts a model 160 dual axis micrometer to an alignment telescope.

Specifications

Material: Aluminum

Finish: Black anodize

May be used with...

- 190 and 160 micrometers
- Any telescope with a 2¼" barrel diameter
