

SRT-VAS Series

Stick-on "Retro" Targets - Normal Temp Range

Individual Targets or Roll of Equally Spaced Targets

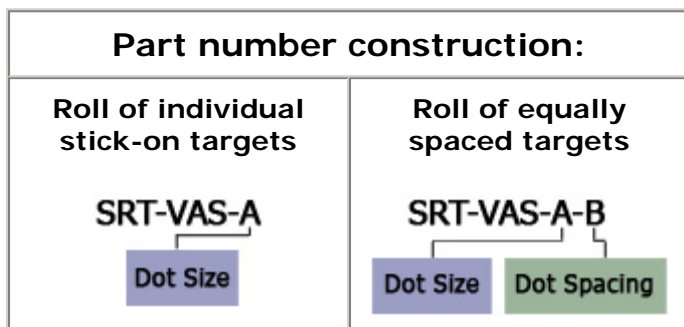

The **SRT-VAS Series** of retroreflective targets is designed to work in a "normal" (human tolerable) temperature range. Target dots are 3M® 7610 retroreflective material, placed on a black vinyl backing, which increases target-to-background contrast. This series employs a pressure-sensitive acrylic adhesive, and may be applied to a variety of materials. We always recommend an initial trial on a test surface to determine ease of removability and characteristic of any residue that may be left.

This series is available in two configurations (photo at right):

- **Individual targets.** A roll of stick-on targets that may be individually peeled off, having a square-shaped background. (Used for random placement on the measuring surface or for measurement of specific features.)
- **Consecutive targets.** A roll of targets, all spaced a specific distance apart, that may be cut by the customer into strips of desired length. (Saves valuable setup time when creating a grid of targets or when establishing contour lines.)

The SRT-VAS series may be ordered in increments of 1,000 target dots, with a minimum order of 1,000 dots. Individual rolls have a maximum length of 200' (61m), and the number of rolls delivered depends upon the center-to-center spacing of consecutive targets.

Construct your desired part number using the guide at left and the information in the tables below. These tables show many of the typical dot size and spacing options. However, other configurations are also available. Contact us if you don't see what you are looking for.

Dot Dia.	A	Dot Dia.	A
0.060"	060	2mm	2MM
0.080"	080	3mm	3MM
0.090"	090	4mm	4MM
0.125"	125	5mm	5MM
0.160"	160	6mm	6MM
0.200"	200	10mm	10MM
0.250"	250	12mm	12MM
0.325"	325	20mm	20MM
0.375"	375	25mm	25MM
0.500"	500		
0.750"	750		
1.000"	1000		

Spacing	B	Spacing	B
0.5"	500	25mm	25MM
1"	1000	50mm	50MM
2"	2000	75mm	75MM

5"	5000		
6"	6000		

Specifications

Maximum roll length: 200' (61m)

Minimum order quantity: 1,000 target dots, typically delivered on one roll. Additional roll(s) will be supplied if requested target spacing for consecutive targets exceeds 2.4" (61mm).

Material: 3M® 7610 target dots on vinyl backing

Target Height: Target dot is 0.012" (.30mm) above the adhesive surface.

Adhesive: Acrylic

May be used with...

- Smooth finished metal, composites, glass, painted metal, and sulfur clay (e.g. automotive models), and other materials.
